

ONE DAY SEMINAR ON VALUE ENGINEERING

On 17th may 2022 a seminar was held on value engineering by Sri. K.Vijay Kumar Ex.Project Manager at AFCONS. He started the conversation with the definition of Value Engineering.

Value engineering was developed by general - electric corporation during World War 2 and is widely used in areas such as defence, transportation, construction and health care.

- VE is an effective technique for reducing cost, increasing productivity and quality
- It can be applied to hardware and software development, production and manufacture, construction and other acquisitions.

Sir also explained what is value, stages of value engineering and types of value engineering.

He also explained the usage of value engineering in Construction Sector, Applications of value engineering in Construction Projects

He also explained what is attitude and what type of attitude should be there for a Civil Engineer.

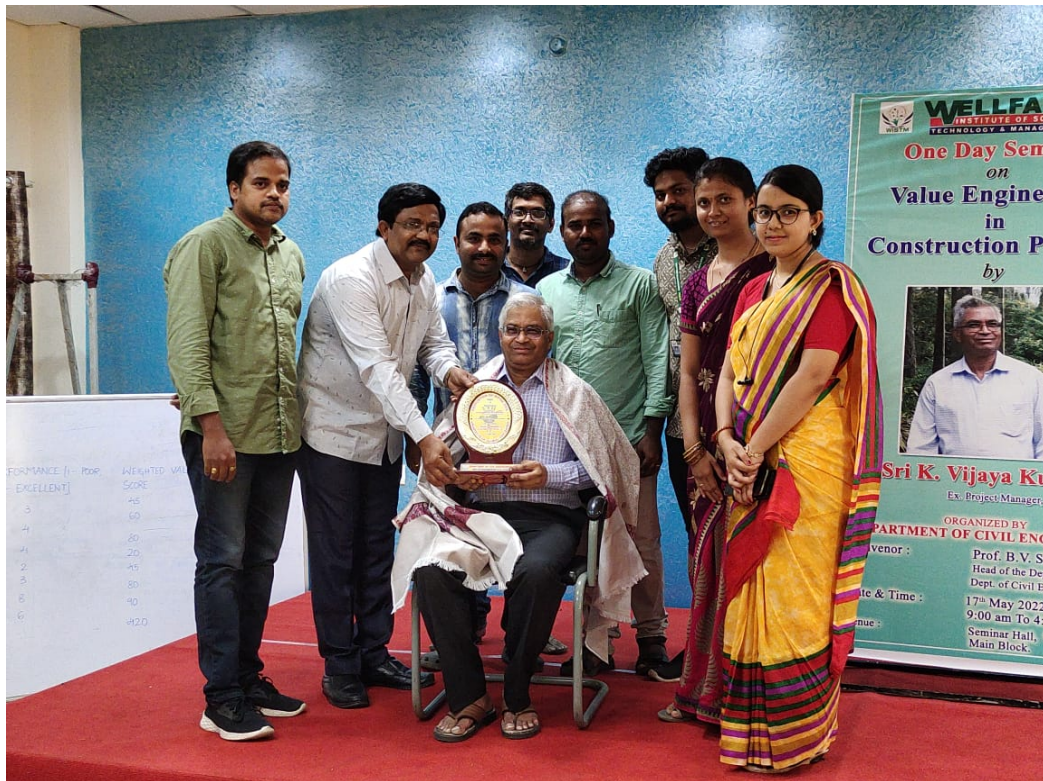

He also shared some of his experiences of his Civil Engineering Career and his challenges and backdrops he faced in his career.

Then the students asked some questions and gave a small thankvisit to the Sri K. Vijay Kumar

Then the Hod and all the faculty members have given the memonto of memorandum to the K. Vijay Kumar Sir

And finally the Students have taken the photos with the Vijay Kumar Sir and the one day seminar was completed.
